

Installing Dash Software

Minimum requirements:

- Windows XP
- Processor: 1 gigahertz (GHz)
- RAM: 1 gigabyte (GB)
- Hard disk space: 200 MB
- Display: 800x600

For a first-time installation at this school:

1. If Dash is to be used by more than one person in the school:

Create a Dash folder on the network drive

Ex: X:/Dash

Otherwise, create a folder on the C:

Ex: C:/Dash

2. Download the executable from the link provided by your Dash contact and save it in the same 'Dash' folder.

Create a shortcut for Dash:

- Open a file explorer window with **Windows + E**
- In the left-hand column, click on your school's network drive (or C drive: if it's a locally installed Dash)
- Then, double-click on the **Dash folder**
- **Double-click on SCHOOL32.EXE** (where SCHOOL= the name of your school), this will launch Dash a first time. If you are not sure which file to click on, it is the one that is an 'application'.

Nom	Modifié le	Type	Taille
Help	2020-01-17 17:19	Dossier de fichiers	
VERSIONS	2020-01-17 17:19	Dossier de fichiers	
DASH	2020-01-14 10:51	Fichier CFG	1 Ko
FTPD	2020-01-17 17:19	Document texte	1 Ko
INSTDASH	2020-01-17 17:19	Document texte	1 Ko
SCHOOL32	2020-01-17 17:17	Application	18 843 Ko
ZCONFIG	2020-01-08 16:25	Fichier CFG	1 Ko

- **Remain on Dash's home screen** (The list of schools) and click **File / Create a shortcut on desktop**. This will create the shortcut and close it.
- **Test the new shortcut**

Note: Dash recommends creating the shortcut by the operation in Dash for a number of technical reasons. Using this path, the Dash icon and name will be placed over the shortcut. In addition, users who use more than one Dash will have their various shortcuts renamed appropriately.
